

As truck drivers, we love XM Sattelite Radio. It reduces traffic hazard of having to scan stations whenever the reception area changes. The traffic reports are especially helpful and easy to locate, not like having to find a channel in an unfamiliar area on a channel with only occasional reports. Because we pay for this radio service, we do not feel that the NAB should be able to dictate what we can or cannot receive on our radio. Please reject the NAB's petition 04-160. Sattelite Radio is a great thing!!
